

Voluntary Association for Children at Risk

Greetings,

Fourteen years ago, a group of women founded the Voluntary Association for Children at Risk in Haifa and Northern Israel.

The Association aims at supporting children from low socio-economic background whose needs are not being addressed by the authorities.

Since we are adamant that all the activities are voluntary, including finance and administration with no overhead whatsoever, all donations reach the needy children.

We raise funds by charging entrance fees to lectures given voluntarily by academics, persons of letters and other public figures as well as by donations from people supporting our activities.

We are being addressed by various institutions for children at risk, local authorities, schools for special education and regular schools that diagnose children with special needs.

Gear for disabled children, psycho-didactic diagnoses, dental care, spectacles, and school equipment, are a few samples of the myriad of our activities. Those donations contributed to large scale projects like, dental clinics for the severely disabled, treatment rooms for children with special needs, game rooms in refuges for battered women, etc.

We would appreciate your help in disseminating our story and raising funds.

Donations are tax-deductible (clause 46 of Income Tax Regulations)
